Management information system

📞 0533129926   ✉ arjoan13@hotmail.com   📍 Qassim

objective

A management Information Systems (MIS) student interested in data analysis and business analysis. I aim to obtain a cooperative training opportunity where I can apply and develop my skills in data analytics, requirements understanding, and decision support. I am proficient in Java and SQL/PL at an academic level and experienced in designing systems and databases. I'm a fast learner, pay attention to detail, and handle problems with a structured approach.

Education

Bachelor of Management Information Systems – Expected Graduation: 2026
Qassim university

Skills

Technical skills

- Java – Academic level
- SQL/PL – Academic level
- Excel – data cleaning and analysis
- Microsoft office
- Data flow design (DFD)
- Relational database design (ERD)

Soft skills

- Fast learning
- Professional communication
- Analytical thinking
- Problem solving
- Attention to details
- Active listening

Projects

Relational Database Project – Microsoft Access

Designed relational tables and relationships, created SQL-based queries, and developed a fully structured database that supports consistent data retrieval and reporting.

Object-Oriented Programming Project – Java OOP

Designed classes and implemented core functionalities in Java, applying OOP principles (inheritance, encapsulation, and object interaction) to build a functional application prototype.

Information System Design & Analysis

Conducted requirements analysis and modeled system processes using DFD (levels 0–1–2), resulting in a structured understanding of data flows and functional interactions.
